

Seabourn Quest Sets Sail with Onboard Software Products

Miami, FL – June 8th, 2011 – Onboard, a respected provider of software solutions for the global maritime industry, announced today that it has recently completed installation of its IssuTrax™ Facilities Maintenance Management System, CyberCafe@Sea™ Internet Café, and CurrencyXchange™ Systems onboard the new 450-guest Seabourn Quest. This installation completes delivery of Onboard's software products onboard the ultra-luxury line's three sister ships Seabourn Odyssey, Seabourn Sojourn, and Seabourn Quest and adds to an already existing engagement with Seabourn's three intimate, all suite ships Seabourn Pride, Seabourn Spirit, and Seabourn Legend.

The IssuTrax™ AVO System automates the manual and paper processes that have become commonplace in much of the cruise industry for AVO facilities management. The IssuTrax™ AVO System can be used to manage AVOs, Guest Complaints, Incidents, Facilities Maintenance and more. The web based interface and graphical dashboard can be accessed from any PC on the ship or in the head office. The IssuTrax™ AVO System also supports the use of Mobile devices and can be integrated into the ship's PBX system.

The Onboard CyberCafe@Sea™ Internet Café System has a NO REVENUE SHARE business model which means the customer keeps all the revenue generated by the system. The CyberCafe@Sea™ System is fully customizable and can incorporate the customer's look and feel and branding elements. The system can also work with any Satellite Provider and PMS system and has a variety of billing options and bandwidth control functions.

About Onboard Software and Onboard Technical Services

Onboard provides cruise lines of all sizes with shipboard technical and management services, as well as its suite of software products: CyberCafe@Sea™ a wired/wireless Internet Café, IssuTrax™ AVO a facility maintenance and guest services application, Check-In@Sea™ an e-NOA/D and APIS compliant passenger check-in system, and CurrencyXchange™ a foreign currency exchange system.
